Dear Sir,

Sub: GIDM launches 5 hours basic (Introductory) self-paced e-course on Disaster Risk Management (DRM)

Gujarat Institute of Disaster Management (GIDM) is registered as an autonomous society under the Government of Gujarat. The Institute has been entrusted with the responsibility of human resource development, capacity building, training, research and documentation in the field of Disaster Risk Management (DRM). With the advent of Sendai Framework for Disaster Risk Reduction (SFDRR 2015 - 2030), there has been a paradigm shift from 'Managing Disasters' to 'Disaster Risk Management'. Along with this, the 2030 Agenda for Sustainable Development (Sustainable Development Goals) is steering our world towards sustainable development as an overarching agreement amongst all the nations. Abiding by the Hon'ble PM's 10 Point Agenda, GIDM, through its capacity building programs, is fostering the concerted ideology of risk informed, disaster resilient, sustainable development.

The world is still grappling with the invisible invasion of COVID-19 and while we are still learning to adapt to the New Normal, the importance of adopting new and virtual ways of learning has been strongly reinforced. Aligned to GIDM's noble ideology of fostering a culture of disaster resilience and leveraging the increased interest of the youth and young professionals (YYPs) to learn and orient themselves to the idea of Disaster Risk Management, GIDM is launching a 5 hours self-paced introductory course on Disaster Risk Management. This course is designed to cater to the YYPs, who are expected to be the flagbearers of frameworks like SFDRR, and also any interested and keen individual of the society.

The content of the self-paced e-course has been developed by amalgamating the experiences from the field combined with the recent developments in the DRM leading to a 5 hours course. The units have been designed, keeping in mind, the Priorities for Action of SFDRR, starting with an exclusive element on understanding disaster risk and thereby moving on to understand the disaster risk management machinery (inclusive of the governance aspects as well as

the financial elements) in the nation, with necessary emphasis on enhanced preparedness for effective response, and finally ending on establishing a comprehensive coherence of different international frameworks and agendas which is absolutely essential for developing a disaster resilient sustainable development. The 5 hours course would be available to one and all on <https://gidm.lms.gov.in/>, a learning management system (LMS) provided by National e-Governance Division (NeGD) of the Ministry of Electronics and Information Technology (MeITy), Government of India, in English and Gujarati. The English course is already available on NeGD LMS and the Gujarati course would be available in few days' time. We are indeed very grateful for pro-active support from NeGD.

In addition to this, GIDM is also developing self-paced online 30 hours (2-credit) and 42 hours (3-credit) courses which are envisaged to be regular credit courses for Universities. Further, 42 hours course would be launched as Banded Certificate course by GIDM.

GIDM would like to take this opportunity to request you to kindly share this valuable information amongst all your staffs and networks, requesting them to go through this course. Further, your suggestions are also invited to make the course more fruitful. The Sendal Framework for Disaster Risk Reduction underlines that the responsibility of disaster risk reduction is upon all of the society and all of its institutions. Thus, through this letter GIDM would like to appeal to you to join hands with us in building a culture of disaster resilience.

Let's make India a disaster resilient and sustainable nation.

With kind regards,

Yours sincerely,

[P. K. Taneja]

To,

Dr. V.Thiruppugazh, IAS
